

Vincent Mukuna

Full-stack Software Engineer

Full-stack software engineer with experience shipping web, mobile, SaaS, and AI products across new builds and established codebases. Currently a Frontend Engineer with Mindful Trader LLC, contributing across customer-facing products and internal tools, with a UX background and a strong focus on clear, dependable product work.

Nairobi, Kenya · Remote · [builtby.vin](#) · [linkedin.com/in/vinmukuna](#) · [github.com/VincentMukuna](#) · [upwork.com/freelancers/vinmukuna](#)

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, React, Next.js · **Mobile:** React Native, Expo, app release · **Backend:** Node.js, Laravel, Supabase, PostgreSQL, Stripe

AI: OpenAI API, Vercel AI SDK, tool calling, retrieval, human controls · **Product:** UX, requirements, testing, maintenance

EXPERIENCE

Mindful Trader LLC

Frontend Engineer · Contract · Jan 2026 – Present · Remote

- Working across customer-facing products and internal tools to make key workflows simpler, clearer, and more reliable.
- Recent contributions include a redesigned user dashboard on StockMarketGuides, which has received positive user feedback.

Self-employed

Software Engineer · Freelance · Dec 2024 - Present · Remote

- Build and maintain web and mobile products for startups and product teams, taking work from early prototypes through production and launch.
- Built much of BetterFlow alongside its founder and carried the work through launch across public booking, business dashboards, React Native apps, backend workflows, and Stripe payments.
- Turned AmpleLeads from an early AI prototype into a production system with authentication, payments, realtime behaviour, and secure team-scoped data.

Kibbe AI

Frontend Developer · Full-time · Feb 2025 - Jan 2026 · Remote

- Built and refined the Next.js and TypeScript frontend across the product's core AI-assisted discovery flows.
- Shipped the frontend through launch and supported the product as it reached its first users.

Trans Business Machines Ltd

Software Developer · Contract · Sep 2024 - Sep 2025 · Nairobi · Hybrid

- Took a property management concept from field research and site visits to a working prototype while contributing to internal and client-facing software.

Statsspeak

Software Developer · Internship · Jun 2024 - Sep 2024 · Nairobi · Hybrid

- Built a learner book-sharing platform and prototypes for NGO projects as part of a newly forming software team.

SELECTED PROJECTS

Owwed · Expo, React Native, TypeScript · [owwed.builtby.vin](#) · [App Store](#)

Designed, built, tested, and released a local-first debt tracker that works without an account and keeps its core data on-device.

Oak & Pine · AI workflows, tool calling, human controls · [oak.builtby.vin](#)

Built a public AI operations demo connected to customer, CRM, and booking workflows with staff review and takeover.

EDUCATION

University of Nairobi · Computer Science coursework · 2021 - 2024
